EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael Mallie on November 10, 2005.

The application has been amended as follows:

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: Figures 1(a) and 1(b) should be designated by a legend, --Prior Art--. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Claim 26, line 3, the recitation, "wherein the" has been deleted and replaced by --the hardware architecture comprising: a--.

Claim 26, line 3, the recitation, "arc transitions" has been deleted and replaced by --arcs--.

Claim 26, line 7, the recitation, "the" before "input data" has been deleted.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The closest prior art of record, Mergard, taken alone or in combination of other references, does not teach or fairly suggest a hardware architecture for the implementation of

computational and control flow graphs, the architecture comprising, among other things, a plurality of connectivity control logic to independently enable and disable each of the connections within the plurality of interconnections to form the control flow graph with the plurality of node elements, the control flow graph being one of multiple possible control flow graphs implementable by enabling and disabling an arbitrary set of the connections within the plurality of interconnections (claim 1); a plurality of supernodes, a plurality of interconnections to connect supernode elements; a plurality of connectivity control logic to enable and disable connections within the plurality of interconnections to form a first control flow graph with the plurality of node elements; and a plurality of evaluation logic coupled to the interconnections and operable to evaluate input data against criteria, the plurality of evaluation logic to control one or more state transitions between supernode elements in the first control flow graph (claim 25); and a control flow graph comprises of M nodes, M^2 arcs, M^2 symbols for evaluation and M^2 storage elements, wherein each of the M^2 storage elements stores a value used to independently enable or disable an associated one of the M^2 arc transitions between the M nodes (claim 26).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel D. Chang whose telephone number is (571) 272-1801. The examiner can normally be reached on Monday through Friday.
